Who we are

Since its inception in 2000, Bond Consulting Services (BCS) has become a premier financial and operational systems provider. We utilize industry-leading applications and proven methodologies to ensure efficient and effective use of technology enabling our clients to solve real business problems. BCS is a Microsoft Gold Certified Partner focused on selling and supporting Microsoft Dynamics™ GP (formerly Great Plains), Microsoft Dynamics™ CRM (Customer Relationship Management), and related ISV (Independent Software Vendor) solutions.

Generate interactive reports faster, and reduce administrative tasks with automated report building and processing.

What BCS can do for you

Applying these proven methodologies, we will assist you with every aspect of operational and accounting system selection and implementation, including:

- Needs assessment
- Installation
- Configuration
- Process redesign
- Customization
- Data migration
- Integrations
- Documentation
- Training
- Reporting
- Support

Our team of dedicated professionals are highly qualified under Microsoft's training programs and required standards to be gold certified partners.

We partner with Specialists

BCS is committed to providing you with the best possible solution for your recycling business. To achieve this, we partner with 21st Century Programming (21 CP). 21 CP's powerful program, ROM (Recycling Operations Manager) is an ideal program for one and two-site recycling operations, whether they handle scrap metals, paper, plastic or multiple materials. ROM's many features enable recyclers to enhance their operations in a number of areas including scale systems, inventory control, payments & receivables, dispatch & bin tracking, and shipping & order management.

The ROM & Microsoft Connection

ROM is fully integrated with Microsoft Dynamics and together, produce a robust enterprise package tailored just for you. In addition to this collaboration of software, all systems are integrated with the Microsoft® Office System which means familiarity and ease of use for the end user, cutting down on precious adaptability time which is inevitable with many other solutions. We at BCS and 21 CP know how important it is for you to get up and running quickly after implementation of a new system. Microsoft Dynamics and ROM are the ideal solutions to ensure you do just that!
